# GLASS DOOR REACH-IN REFRIGERATORS (1 SECTION)

AIA#

# Model 1-1020GD

Stainless steel cabinet interior and exterior front, sides with two pane glass doors.

# **Model 2-2020GD**

Stainless steel cabinet exterior front, sides and floor with two pane glass doors. Heavy gauge aluminum cabinet interior.

# Model 4-4020GD

Heavy gauge anodized aluminum cabinet exterior sides. Stainless steel cabinet front except for aluminum ends that wrap around front. 2 pane glass doors.

Heavy gauge aluminum cabinet interior with stainless steel floors.

### **Standard Features**

- Top mounted compressor and evaporator coil
- Expansion valve
- Hot gas condensate evaporator
- Windrunner gradient air displacement process
- R-134a refrigerant
- Exterior digital thermometer
- Self-closing spring loaded hinges
- 6 inch adjustable legs
- Baked epoxy-coated shelves adjustable on 1 inch centers

# **SPECIFICATIONS**

Cabinet - Cabinets are all metal, inside and out. The top, back, and bottom are made of galvanized steel. In addition, all seams are closed and sealed, with metal edges turned away from the exposed surface. The result is an integrated structural frame. Internal corners are coved to conform to NSF standards. Automatic interior lighting is controlled by a light switch mounted inside.

**Doors** - Hinged glass doors with horizontal 40 watt fluorescent lighting. (1 section only, 2 & 3 sections vertical.)

**Insulation** - Cabinet body, doors, and evaporator coil housings are filled with pressure-injected polyurethane foam.

Interior Shelves - Three wire shelves per sec-

tion are standard. Shelves have a runner spaced 3/4 inch O.C. with two reinforcing bars 8 1/2 inch O.C. Coated with 7 mils of baked-on gray epoxy. The shelves have a saline spray corrosion resistance of 600 hours. Shelves will support 250 pounds each with maximum cabinet load of 800 lbs. They are supported on stainless steel pilasters, and are adjustable on 1 inch centers. All three shelves are interchangeable and can be adjusted without tools or special parts.

**Self-Contained Refrigeration** - The complete refrigeration assembly is mounted on top of the cabinet behind a removable hatch cover. Refrigeration components include a hermetically sealed compressor, thermostatic expansion valve, thermostatic temperature control, high-humidity evaporator coil and

hot gas condensate evaporator. The system is balanced to maintain 38°F average internal air temperature. Windrunner gradient air displacement process provides even air flow and temperature control throughout the cabinet. All components are factory installed and tested, and supplied with an attached cord and plug (self-contained, 115 volt only less than 16 amps), master power switch, and exterior digital thermometer.

Remote Cabinets - Standard remote units are provided with capped refrigeration lines, expansion valve, solenoid valve, electric condensate evaporator, and temperature control. Condensing unit is not included. All other features are the same as self-contained units, except power cord.
